

# MOLD JACKS AND UNIVERSAL GRATE SPIDERS

## Prevent parting line damage with Automatic Mold Jacks.

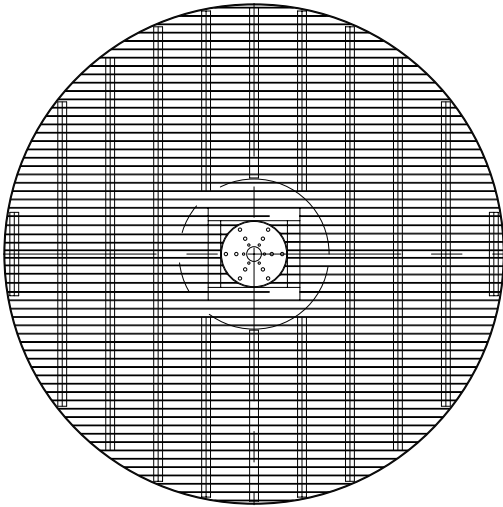

Lakeland Mold offers a unique mold opening device for rotational molders. Automatic Mold Jacks® (patent pending) may prevent many problems associated with mold halves sticking together during the unloading process. Reduces cycle times thereby increasing production. A set of four Automatic Mold Jacks® is recommended per mold or spider up to 10' diameter, 2,000 pounds. Customer must supply push plate to fit individual mold or spider. Installation not included.

### Ordering Information

**MJ-2000** Automatic Mold Jack (set of four)

## Mount molds in any location with a Universal Grate Spider.

With 1-1/2" spacing, universal grates are an excellent means of mounting multiple framed molds on a common grid. The grates bolt directly to the hub of the machine arm, while the individual mold frames bolt directly to the grate. Lakeland Mold will customize a grate to your specifications for any arm or machine.
