

BLANK WHEEL AND ARROW PEGS

BWA-2000

Blank Wheel

The blank wheel offers molders the ability to blank out an area. Installation and operation is similar to the other code wheels, the outer dimension being the same size. Repositioning the arrow is simply a matter of loosening the jam nut, rotating the wheel to the desired position, then retightening the nut.

Ordering Information

BWA-2000 Blank Wheel Assembly

BW-2000 Blank Wheel

AP-YEAR Arrow Peg (specify year when ordering)

Note: Assembly includes 3/4-10 and 3/8-16 jam nuts, 3/8" lock washer and arrow peg.

Arrow Peg

AP-2000

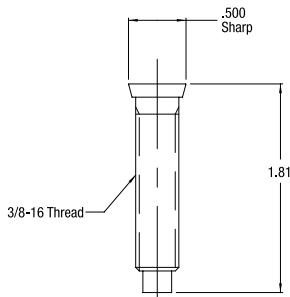

Made of 416 stainless steel and threaded for a 3/8-16 nut, these arrow peg inserts are designed to fit any of the date code wheels in this catalog. Wrench flats on the end provide for easy adjustment.
