

CODE WHEELS

DWA-2000

Day Code Wheel

The day code wheel offers molders the ability to track production by day. Installation and operation is similar to the other code wheels, the outer dimension being the same size. Repositioning the arrow is simply a matter of loosening the jam nut, rotating the wheel to the desired position, then retightening the nut.

Ordering Information

DWA-2000 Day Code Wheel Assembly

DW-2000 Day Code Wheel

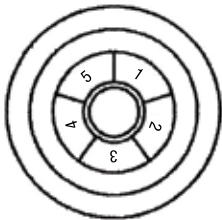

AP-YEAR Arrow Peg (specify year when ordering)

Note: Assembly includes 3/4-10 and 3/8-16 jam nuts, 3/8" lock washer and arrow peg.

Week Code Wheel

WWA-2000

The week code wheel offers molders the ability to track production by the week. Installation and operation is similar to the other code wheels, the outer dimension being the same size. Repositioning the arrow is simply a matter of loosening the jam nut, rotating the wheel to the desired position, then retightening the nut.
